			9			
1.	How do you use Image A	ugmentation in TensorFLow		1 / 1 point		
	With the tf.augment	API				
	Using parameters to the ImageDataGenerator					
	O You have to write a plugin to extend tf.layers					
	With the keras.augment API					
	Correct!					
2.	If my training data only loverfitting?	has people facing left, but I wan	nt to classify people facing right, how	would I avoid 1/1 point		
	Use the 'horizontal_	flip' parameter				
	O Use the 'flip' parameter					
	Use the 'flip' parameter and set 'horizontal'					
	Use the 'flip_vertica	l' parameter around the Y axis				
	○ Correct That's right!					
3.	After adding data augme	entation, you noticed that the tr	raining became a little slower than wh	nen you trained 1/1 point		
		arocessing takes cycles				
	Because the image processing takes cycles Because the augmented data is bigger					
	Because there is more data to train on					
	Because the training is making more mistakes					
	○ Correct That's right!					
4.	What does the fill_mode	e parameter do?		1 / 1 point		
	○ There is no fill_mod	e parameter				
	O It creates random no	oise in the image				
	It attempts to recreate lost information after a transformation like a shear					
	It masks the background of an image					
5.	When using Image Augme	entation with the ImageDataGene	erator, what happens to your raw image	data on-disk. 1/1 point		
	O It gets overwritten, so	o be sure to make a backup				
	O A copy is made and t	he augmentation is done on the o	сору			

Nothing, all augmentation is done in-memory

O It gets deleted

6.	How does Image Augmentation help solve overfitting?	1 / 1 point
	 ○ It slows down the training process ○ It manipulates the training set to generate more scenarios for features in the images ○ It manipulates the validation set to generate more scenarios for features in the images ○ It automatically fits features to images by finding them through image processing techniques ○ Correct 	
7.	That's right! When using Image Augmentation my training gets	1 / 1 point
	SlowerFasterStays the SameMuch Faster	
	○ Correct That's right!	
8.	Using Image Augmentation effectively simulates having a larger data set for training. False True	1 / 1 point
	Correct Exactly!
